Description of priority: Priority category # 5 - Replacement, renovation or modernization of school facility systems, such as roofs, windows, boilers, heating and ventilation systems, to increase energy conservation and decrease energy related costs in a school facility. Description of deficiency: The High School roof dates back to the initial construction which occurred in 2001. The entire roof has multiple leaks which have penetrated the building. The district has continually patched this roof to extend its useful life. It is a common occurrence for water to drip in through the ceiling during heavy rain storms. During the 2004 renovation all portions of the roof were replaced with the exception of the D Wing area and the Auditorium area. These two areas are now failing and are in dire need of replacement; and hereby further specifically acknowledges that by submitting this Statement of Interest
