CONTINUED PUBLIC HEARING(S):

NOI 40-1445 11 Susan Road – Stevie G. Browning – [CCC Env. Serv’s] – [DEP: waiting for fee – Technical Comments: The project as described in the NOI cannot be approved. Plans are inadequate for review as they do not show where the work is being proposed in proximity to the wetland boundaries or where the erosion control will be installed. The proponent must delineate all wetland resource areas within 100 feet of the work area, including Bank associated with the intermittent stream and BVW, and they should be shown on the revised plan. The NOI narrative discusses invasive species, such as bittersweet, which will be removed from the BVW and along an intermittent stream. The proponent must species all of the invasive species that are proposed to be removed and describe how they will be eradicated. The NOI form and site plan must be revised to show where the alteration is occurring, and how much alteration and restoration is proposed. Annual and perennial wildflowers are not appropriate for BVW restoration; therefore, restoration efforts must be revised with seed mixes and species that will tolerate saturated and/or inundated soil conditions. A planting plan must be submitted. Further explanation of why the stream needs to be cleared of any material is needed.] -Restoration of buffer zone and resource area
